

BOBBY LEHMANN TRUCKING

Bobby Lehmann Trucking, founded in 1978, is a full service, rig moving, and oilfield equipment hauling trucking company.

The veil of darkness
Transformed to the brightest light.
The most dreadful end
Became the most beautiful beginning.
The depths of despair
Fade to reveal hope everlasting.
The curse of death
Defeated by eternal life.
Thank you Lord, for the wonder of Easter.

Crane operators and drivers, you are doing a great job with the Job Safety and the Job Safety Analysis Sheets you are doing on each job. More and more contractors are requiring them, so it is something we need to get used to doing.

JSA's are a great reminder of what could go wrong with the job you are about to do and what you can do to eliminate or deal with any hazards there may be. Complacency can get you hurt or killed.

Truck Parking

The implementation of ELDs (Electronic Logging Devices) along with the 30 minute mandatory break is starting to put pressure on truck parking spots. Truck stops and roadside rest areas are often full of trucks. You may be tempted to park at unsafe locations, such as on the shoulder of the road, exit ramps, or vacant lots, if you are unable to locate official, available parking. Don't do it. Those days are gone.

You may have to do some planning, and it may not be easy, but always find a safe, secure, and accessible spot to rest.

Uniforms

A number of companies require workers to wear uniforms to give an impression of organization, competence and professionalism. How you take care of your work uniform is an important factor in how clients perceive you and whether or not they feel confident in your skills.

Taking care of your work uniform is not a difficult process once you figure it into your weekly routine. You are issued enough uniforms to get you through a week. At Bobby Lehmann Inc., we turn in every Thursday. If you turn in 5 shirts and 5 pants on Thursday and get back 5 shirts and 5 pants the next Thursday, wonderful. If you don't, I need to know about it immediately. Take care of your uniforms and keep track of them. Treat them as your own, because if you lose them, you buy them.

(Uniforms continued on page 2)

He was a widower and she a widow. They had known each other for a number of years, having been high school classmates and having attended class reunions in the past, without fail. This 60th anniversary of their class, the widower and the widow made a foursome with two other singles. They had a wonderful evening, their spirits high, with the widower throwing admiring glances across the table . . . and the widow smiling coyly back at him.

Finally during one dance, he picked up courage to ask her, "Will you marry me?"

After about 6 seconds of careful consideration, she answered, "Yes.... yes I will!"

Needless to say, the evening ended on a happy note for the widower. However, the next morning he was troubled. Did she say Yes or did she say No? He couldn't remember. He went over-and-over the conversation of the previous evening, but his mind was blank. He remembered asking the question, but for the life of him could not recall the answer. With fear and trepidation, he picked up the phone and called her. First, he explained that he couldn't remember as well as he used to. Then he reviewed the past evening. As he gained a little more courage, he asked her, "When I asked if you would marry me, did you say Yes or did you say No?"

"Why you silly man," she replied, "I said Yes. And I meant it with all my heart!"

The widower was delighted. He felt his heart skip a beat. Then she continued. "And I'm so glad you called, because I couldn't remember who asked me."

The Trucker's Prayer

Down every highway that you travel
Though blacktop, stone or gravel,
On every journey through and through,
May God's angel ride with you.

Happy Birthday Jose H.!

April 12

LOTO (Lockout Tagout)

Anytime you operate, clean, service, adjust, or repair equipment you should be aware of the hazards associated with that machinery. Any powered machinery or electrical equipment that can move in a way that would put you in danger is a hazard that can be prevented by following LOTO procedures. Failure to lock out or tag power sources on equipment can result in electrocutions, amputations, and other serious-sometimes fatal-accidents.

Uniforms cont.

The racks in our uniform room are marked with each employee and their uniform number. You all have your own space and that is where your uniforms should stay. I know that sometimes the delivery man will get something in the wrong place, but that is usually because the rack markers with your name have been moved or removed. Occasionally you are shorted an item and sometimes you just think you are. Always look through to make sure the item is not mixed in with some other employee's uniforms. I find it odd how some employees never have a uniform problem, and some repeatedly have a problem.

The best thing for you to do is to take your uniforms home. Remember, at some point you are going to be charged for lost uniforms.
